

LINVISIBLE®

Project showcase

Private House
Cesenatico, Italy

Introduction

LINVISIBILE is the lead manufacturer of interior flush to wall doors 100% made in Italy, with 30 years of experience delivering to our clientele products and services of exclusive design and elevated quality.

Our business model is focused in offering a full service from support in the projecting phase to the installation on site; providing our customers all that's necessary to create unique spaces, thanks to our wide experience in developing highly customized products of extraordinary design and materials.

Due to LINVISIBILE's international mindset and experience, we have been honored to take part of some of the most exclusive developments in diverse areas of the globe. In this document, we are proud to showcase one of these endeavors and show you a token of what we are able to deliver.

Description

Project: Private house

Location: Cesenatico, Italy

Architect: Profili Associati

Schedule: 2010

Essentiality, the mimicry and the light are the absolute protagonists of Profilo Associati Studio's project, in the realization of this splendid home, located on the Darsena in Cesenatico. An environment that is told through the elegance of white, which exalts the geometries of the interiors and the beauty of the furnishings - with a little retro taste - where the doors are in uniformity with the walls, revealing themselves with grace and harmony.

Linvisibile doors integrate perfectly into the ambiance, they become wall or door as needed. A motorized Concealed Sliding door (with an also perfectly concealed command plaque), a Filo 10 Vertical Pivot door and other Hinged doors become a masterpiece of mimicry, and recall, with their fluid and perfect movements, those of the sea that is observed from the house's panorama.

Furnishing specifications

For this project, LINVISIBLE provided approximately **10 highly tailored doors**, in a variety of typologies, finishes and dimensions.

In addition to furnishing our doors, LINVISIBLE offered a complete service experience **supporting our clients in the design phase, transportation and installation.**

Products furnished:

BREZZA | Filo 10 Vertical Pivot door

ALBA | Hinged doors

MAREA | Concealed sliding door

Finishes: as wall

Product descriptions

BREZZA | Filo 10 Vertical Pivot door

Made with a 10 cm thick panel - as thick as the wall - Linvisibile Vertical Pivot door Filo 10 is the first door totally flush with the wall on both sides. Available with or without stop, thanks to a sophisticated system of concealed pivots, the door can rotate itself up to 360 opening degrees, obtaining a very exciting effect of movement.

Filo 10 is an evolution of the Vertical Pivot door, can be made in all dimensions and with all coverings, meaning it adapts to all settings, and can be perfectly invisible thanks to total continuity between door and wall.

ALBA | Hinged doors

Linvisibile's hinged system is our exclusive patented door, which is completely flush with the wall and reinterprets the traditional hinged opening; available in pull and push opening models. It's distinguished by the use of concealed hinges and the absence of doorframes or jambs to achieve seamless continuity between wall and door. It can be painted in the same finishing as the walls, becoming almost invisible.

Or the door structure can be left visible, with only the panel forming part of the design continuum and the panel finishing. The system also can be coated with almost any type of material (metal, stone, leather) to create special atmospheres, in a tasteful way. There are lacquered (glossy or matt) and wooden versions offered as well.

MAREA | Concealed Sliding door

Linvisibile Concealed Sliding door is the first flush-to-wall sliding door. An exclusive patented system that offers an innovative and elegant solution to the classic sliding doors.

Available in motorized version with opening driven by a low-voltage motor and flush-to-wall push-button panel, or in manual version with flush fitting handle system. It can be coated with almost any type of material (metal, stone, leather) to create special atmospheres, in a tasteful way. There are lacquered (glossy or matt) and wooden versions offered as well.

Two cams cause the door to move; these cams allow moving the panel completely flush with the wall (when closing) and slide it inside the wall (when opening). The door operates by sliding along a panel supporting carriage rail, all this mounted within an aluminium casing. Opening can be automatic, by pressing a button that is also flush with the wall, or manual, by a flush fitting handle.
